

Task-2: Build a Testimonials Page

Objective: Create a responsive and visually appealing **Testimonials Page** using HTML, CSS, JavaScript, and Bootstrap. The page should showcase client testimonials in an engaging way.

Requirements:

1. **HTML/CSS/JavaScript:**
 - Create a structured layout for displaying multiple testimonials (minimum of 5).
 - Use **CSS** to style the testimonials with a professional look and feel.
 - Add some **JavaScript** functionality, such as a carousel or sliding feature, to transition between testimonials smoothly.
2. **Design Features:**
 - Each testimonial should include the client's name, photo, title/position, and their feedback.
 - Ensure testimonials are presented in an aesthetically pleasing format, with appropriate spacing and fonts.
 - Use **Bootstrap** for layout to ensure responsiveness across different screen sizes (mobile, tablet, desktop).
3. **Additional Elements:**
 - Include a title or heading at the top of the page (e.g., "What Our Clients Say").
 - Optionally, add ratings (stars) under each testimonial for visual impact.
4. **Responsiveness:**
 - Ensure the page is responsive and works well on all devices.
 - Make sure the testimonials display appropriately on small screens (consider showing fewer testimonials at once, stacked format, etc.).
5. **Browser Compatibility:**
 - Test the page on different browsers (Chrome, Firefox, Safari, Edge) to ensure consistency.
